Jiatao Li

+1 4122095332 | jiataol@andrew.cmu.edu
leejamesss.github.io | github.com/leejamesss

Education

- **Carnegie Mellon University** *Pittsburgh, PA, USA*
  MS in Machine Learning, Advanced Study Sep 2026 – May 2028 (expected)
- **Peking University** *Beijing, China*
  BS in Data Science | ***GPA Rank: 1st in Department (1st every academic year)*** Sep 2022 – July 2026

Research Experience

- **Carnegie Mellon University** *Jun 2026 – Present*
  Researcher (Advisor: ***Prof. Louis-Philippe Morency****)* Pittsburgh, PA, USA
  - **Multimodal Human Behavior Generation:** Investigating co-speech motion generation in conversational settings.
- **SALT Lab, Stanford University** *Mar 2025 – Oct 2025*
  Undergraduate Researcher (Advisor: ***Prof. Diyi Yang****; Stanford* ***UGVR*** *Program)* Stanford, CA, USA
  - **Human–Agent Collaboration:** Built simulated-user and experiment protocols for scalable evaluation; developed a plug-and-play layer separating task execution from user interaction to adapt autonomous agents for collaboration. Evaluated on CoGym, TauBench, OSWorld, and WebArena; explored interactive slide creation with real users.
- **Wangxuan Institute of Computer Technology, Peking University** *Feb 2024 – Jun 2026*
  Undergraduate Researcher (Advisor: ***Prof. Xiaojun Wan****)* Beijing, China
  - **Retrieval-Augmented Generation:** Developed training-free context selection balancing relevance, diversity, and conflict resolution; designed a taxonomy and evaluation of self-generated documents for task-specific context generation.
  - **Trustworthy NLP:** Built datasets and experimental frameworks to probe sociolinguistic biases in AI-text detectors, socio-cognitive differences in LLMs, and aspect-level biases in automated peer review.
  - **Interpretable AI-Text Detection:** Developed a multi-agent detector grounded in linguistic guidelines, with evidence spans, rationales, and confidence estimates to support human decisions.

Research Grants

- **PI, ACCESS Explore Allocation** *2026–2027*
  Multimodal co-speech motion generation. (200,000 ACCESS Credits; in-kind computing support)
  NSF-funded ACCESS program

Selected Awards

- Beijing Outstanding Graduate; Peking University Outstanding Graduate *2026*
- **Peking University Annual Person of the Year Nominee**(45/65k+, blog spotlight) *2025*
- National Scholarship (China's highest-level undergraduate scholarship, Top 1%) *2025*
- Leo KoGuan Scholarship (Top 1%) *2024*
- CSDN Blog Star of the Year (Ranked 87/50M+ Nationwide, 2M+ visits) *2024*
- Beijing Outstanding Class Award (as Class Monitor; the only one among 1,000+ classes at PKU, top 0.1%) *2024*
- **Peking University Annual Person of the Year Nominee**(Youngest Nominee, 45/65k+, blog spotlight) *2023*
- May 4th Scholarship (the highest honor for students in Peking University, 125/65k+) *2023*
- Alibaba Tianchi BMW 3rd Hackathon (Track & Finals Champion, Team Lead) *2023*
- Kaggle House Price Prediction (Top 1%, Solo) *2023*
- 21st Century Cup National English Speaking Competition (National Second Prize) *2020*
- World School Sport Games Ambassador (China Daily coverage) *2020*
